PRIYAL GANDHI

Full Stack Engineer

priyalg234@gmail.com | +91 9978602646 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building scalable, secure web applications using ReactJS, TypeScript, and REST API-driven backend services (Python, Django REST Framework) backed by PostgreSQL. Skilled in designing and securing APIs with JWT and OAuth 2.0, optimizing relational databases, and deploying cloud-hosted applications (AWS S3; Microsoft Azure Fundamentals certified). Comfortable owning features end-to-end — from technical design through production support — and collaborating with product owners, business stakeholders, and data teams to translate requirements into reliable, production-grade solutions.

TECHNICAL SKILLS

Frontend: ReactJS, JavaScript, TypeScript, HTML5, CSS3, Bootstrap

Backend & APIs: Python, Django REST Framework, REST API design, Microservice-style service architecture, JWT, OAuth 2.0, Role-Based Access Control (RBAC)

Databases: PostgreSQL, SQL Server, SQL query optimization, indexing, stored procedures

Cloud & DevOps: AWS S3, Microsoft Azure (AZ-900 Certified), Git/GitHub, Cloudflare Tunnel, Windows Server deployment, centralized logging & monitoring

Other Tools: Power BI, Supabase, Firebase, Google OAuth

PROFESSIONAL EXPERIENCE

Adrta Technologies Pvt. Ltd., Ahmedabad, India

Junior Software Engineer *Present*

- Design and maintain full-stack features across backend, frontend, and database layers, building REST APIs with Django REST Framework, TypeScript, and PostgreSQL as part of a production application, while resolving reported bugs across the stack.
- Develop Python/Selenium automation and browser-console scripts to streamline repetitive workflows, reducing manual effort and improving operational efficiency.
- Implement application-level security controls, including middleware to enforce single active sessions per user and React-based protections against unauthorized inspection and transaction manipulation — experience directly applicable to building secure, production-grade applications.

Software Developer Intern *Feb 2026 – July 2026*

- Built REST APIs and CRUD workflows across Admin, Store, and Customer portals as part of 3+ production modules, collaborating with product owners and business stakeholders to translate requirements into technical solutions.
- Owned backend design and database schema for production modules (Customer Support, Species Management, Task Management), delivering features from technical design through production support.
- Implemented authentication & RBAC using JWT, Google OAuth 2.0, and dynamic role-based permissions, securing access across all user roles and portals.
- Optimized PostgreSQL performance through stored procedures, indexing, and query restructuring — cutting one dashboard's load time from several minutes to seconds — and built a centralized error-logging system to speed up debugging and monitoring.
- Executed cloud deployments integrating AWS S3 for secure multi-file upload, and managed Windows Server deployments including build packaging, database backup/restore, and post-deployment validation.

PROJECTS

Task Management System — *React, TypeScript, Django REST Framework, PostgreSQL, JWT*

- Built a role-based task management platform with JWT-secured CRUD APIs, audit logging, and database schema triggers to enforce data integrity.

DriveXo, Cab Booking Web Application — *HTML5, CSS3, Bootstrap, JavaScript, Firebase*

- Built a fully responsive cab-booking interface with Firebase Authentication and a real-time database for user login and registration.

Brute Force Attack Simulator — *Python (Flask), HTML, Burp Suite*

- Built a cybersecurity testing platform simulating brute-force attacks, with rate limiting, IP blocking, attack monitoring, and Burp Suite integration for authentication testing.

EDUCATION

MScIT (Fullstack and Cyber Security), SKIPS University, School of Computer Science — Aug 2026

BCA, GLS University, Faculty of Computer Application & IT (CGPA: 7.63/10) — May 2024

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
- Microsoft Certified: SQL AI Developer Associate Certification (DP-800)
- Introduction to Cybersecurity, Cisco Networking Academy
- Full Stack Web Development Bootcamp, Udemy
- Finalist, Ahmedabad University Hackathon (Top 25 of 100+ teams) — Project: Invest Smart-AI
